Top three COVID-19 vaccine manufacturers in the US, by number of doses

Font size too small, min size should be 16px. Left axis "350m doses" and then numbers below that. No axis labels. Order the bars, center the labels under the bars. Does 'other' really need to be there? It's v small and doesn't seem to add much.
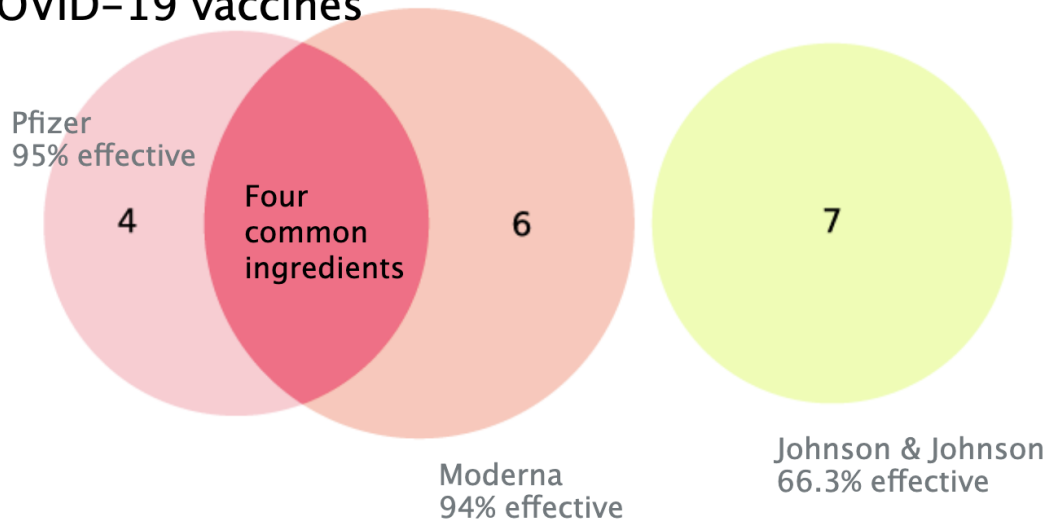

Title goes above graphic, not in graphic

I looked through the list of ingredients for the top three vaccines being used in the US: Pfizer, Moderna and J&J. Both Pfizer and Moderna have fairly similar efficacy ratings at 95% and 94% respectively, according to the CDC. Johnson and Johnson's vaccine is rated at 66.3% for its efficacy.

I assumed Pfizer and Moderna then must be fairly similar in their composition given their similar efficacy ratings and use.

This is… going to make people raise their eyebrows at you. Similarity in this case is not related to efficacy, it's related to being the same type of vax (mRNA). I think an alternative might be, "even though they're the same type of vaccine, they do not share all the same ingredients" or something like that, and provide background on the ingredients. What do these ingredients do? Etc.

Number of ingredients in top three US' manufacturers' COVID-19 vaccines

Pfizer
95% effective

4

Four common ingredients

6

7

Moderna
94% effective

Johnson & Johnson
66.3% effective

Center pfizer/moderna/J&J under the respective circle, line them all up

Instead of efficacy, display the number of ingredients under the name. Bold either name or ingredient count. Efficacy is not related to # of ingredients, so it doesn't need to be on this graphic

Actually call out the shared ingredients in an annotation above, line going down to middle

Summarize the non-shared ingredients

"No shared ingredients" can go in J&J circle

I think you could have an interesting piece here about ingredients in vaccines, mentioning how i dunno things have gone bad with additives in the past etc, people are scared of things, etc, nothing is harmful, etc, but you gotta run run run away from the shared ingredients = success storyline
